Patent Cooperation Treaty Update

Designation for an ARIPO Patent

The African Regional Industrial Property Organization (ARIPO) has 14 member States, 11 of which are party to the Harare Protocol on Patents and Industrial Designs. The Harare Protocol makes it possible to obtain an ARIPO patent effective in any or all of the Protocol's member States.

The United States Patent and Trademark Office received notification from the World Intellectual Property Organization (WIPO) that under amendments to the Harare Protocol and its Implementing Regulations adopted in April 1994, an international application under the Patent Cooperation Treaty (PCT) will be able to include a designation for an ARIPO patent (two-letter code: AP) of those Harare Protocol member States which are also Contracting States of the PCT. Processing of such international applications in the regional phase will be undertaken by the ARIPO Office as a designated (or elected) Office under the PCT.

The amendments to the Harare Protocol entered into force on July 1, 1994. Kenya, Malawi and Sudan, which are Harare Protocol member States, are already bound by the PCT and thus, can be designated for an ARIPO patent. It also remains possible to designate those States for national patents under PCT. Swaziland, which is also a Harare Protocol member State, will become bound by the PCT on September 20, 1994 (see below), and will be able to be designated for an ARIPO patent from that date.

Accession by Swaziland

The United States Patent and Trademark Office received notification from WIPO that Swaziland deposited its instrument of accession to the PCT on June 20, 1994. Swaziland will become the 73rd Contracting State of the PCT on September 20, 1994. Consequently, nationals and residents of Swaziland are entitled to file international applications under the PCT on and after September 20, 1994, and from the same date it is possible to file international applications designated and electing Swaziland (country code: SZ).

Since Swaziland is a member of the Harare Protocol within the framework of ARIPO, Swaziland will be able to be designated for a patent granted by ARIPO. As of September 20, 1994, any designation in an international application for an ARIPO patent will automatically include the designation of Swaziland for that purpose. It is expected that the national law of Swaziland will be changed to provide that any designation of Swaziland in an international application shall have the effect of an indication of the wish to obtain an ARIPO patent.

Patent Term Extended Under 35 U.S.C. § 156(e)(2)

A second interim extension of the term of U.S. Patent No. 3,975,512 has been granted under 35 U.S.C. § 156(e)(2) for a period of one year from the first extended expiration date of the patent. On September 2, 1993, a first interim extension was granted under 35 U.S.C. § 156(e)(2) extending the term of the patent for a period of one year. See 1154 OG 85. The first extended term of the patent expires on August 13, 1994. An application for patent term extension was filed by the patent owner of record The Board of Trustees of the University of Illinois based on approval of the product "IMAGENT GI" by the Food and Drug Administration. The initial PTO review of the application to date indicates that the '512 patent would be eligible for a maximum two year extension of the patent term under 35 U.S.C. § 156 (g)(6)(C).

Advance Notice of Change to MPEP § 1309

This memorandum is to provide advance notice of a change to a portion of MPEP § 1309 which will appear in the next revision to the Manual. The change is being implemented because the Office has been made aware of the need and desire of some law firms to have listed on a patent the firm name as well as the names of the attorneys or agents who worked on the patent application. The applicable portion of MPEP § 1309 will be changed to read as follows:

Printing Names of Practitioners and Firm on Patent

The Issue Fee Transmittal form provides a space (item 4) for the person submitting the base issue fee to indicate, for printing, (1) the names of up to three registered patent attorneys or agents or, alternatively, (2) the name of a single firm, which has as a member at least one registered patent attorney or agent,

and the names of up to two registered patent attorneys or agents. If the person submitting the issue fee desires that no name of practitioner or firm be printed on the patent, the space on the Issue Fee Transmittal form should be left blank. If no name is listed on the form, no name will be printed on the patent.

The change in practice will take effect immediately.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
